VISIONARY DESIGN

The Zone Controllers offer extended utility to the DriveRack™ family. Based on the same unparalleled design philosophy as the other products in the dbx® line-up, the Zone Controllers offer additional control to installations featuring the DriveRack™ 260. The five Zone Controllers use analog DC voltages to provide logic control ranging from Volume and Mute control, to Contact Closure Program selection. Wired with readily available and affordable CAT5 cable with universally accepted RJ-45 connectors, the ZC Zone Controllers offer simple yet elegant solutions to the contractor.

REVOLUTIONARY ENGINEERING

The ZC-1 offers remote programmable, Volume control to any installation using the DriveRack™ 260. The ZC-2 provides programmable Volume and Mute control. Both the ZC-1 and ZC-2 can be programmed for up to six outputs of the DriveRack™ 260. The ZC-3 allows Program Selection on the 260. The ZC-4 also offers Program Selection via Contact Closure inputs for Room Combining applications. Up to six Zone Controllers can be used with a single DriveRack™ 260, and can either be wired in series or parallel. The ZC-BOB was created to accommodate "home-run" or parallel wiring to the unit. With a maximum recommended cable length of 1,000 feet, the Zone Controllers offer a simple way to create elegant solutions for many installation applications.
